

PAVAN R

Java Full-Stack Developer

pavanryadavkumsi25@gmail.com | +91 93805 42214 | Bengaluru, Karnataka, India (Open to Relocation)
[linkedin.com/in/pavan-r-9035b62a2](https://www.linkedin.com/in/pavan-r-9035b62a2) | github.com/PAVANRYADUVANSHI | pavanryaduvanshi.github.io
Experience: Fresher (0 Years) | Immediate Joiner | Open to Relocation Across India

PROFESSIONAL SUMMARY

Fresher Java Full-Stack Developer with hands-on experience building and deploying production-grade applications using Spring Boot, React.js, and MySQL. Delivered a 4-member Agile team project — a food delivery platform with JWT auth, an AI-powered customer support chatbot, Redux state management, and Docker deployment — participating in sprint planning, standups, and retrospectives. Comfortable across the stack: REST API design, Hibernate/JPA, CI/CD via GitHub Actions, and testing with Postman/REST Assured. Also has practical exposure to Generative AI integration (OpenAI/Claude APIs, prompt engineering) applied to product features. Mechanical Engineering graduate who transitioned into software through certification and self-driven projects, bringing strong analytical thinking, cross-functional collaboration, and fast learning ability. Seeking entry-level roles as a Java Full-Stack Developer, Full-Stack Engineer, or API/QA Engineer.

KEY SKILLS

Java, Spring Boot, Spring Security, Hibernate/JPA, REST API, Microservices, React.js, TypeScript, Redux, MySQL, JWT Authentication, Docker, CI/CD (GitHub Actions), JUnit, REST Assured, Postman, LLM API Integration (OpenAI, Claude), Prompt Engineering, Agile/Scrum, Git, OOP, SDLC

PROJECTS

FAST — Full-Stack Food Delivery Platform (Production-Deployed) | Jan 2026 – Mar 2026

Team of 4 | Full-Stack Developer

github.com/PAVANRYADUVANSHI/FAST-Food-Delivery-App

Backend: Java, Spring Boot, Hibernate/JPA, MySQL, JWT, Maven, REST API, Docker, GitHub Actions (CI/CD)

Frontend: React.js, TypeScript, Redux, React Router, CSS3

AI: Integrated AI chatbot for customer support

- Delivered a zero-downtime platform serving 500+ menu items with 100% endpoint coverage — validated across auth, menu, and order APIs via Postman and REST Assured — by building Spring Boot REST APIs with JWT authentication, role-based access control, and Hibernate/JPA ORM.
- Integrated an AI-powered chatbot for customer support, applying prompt design and API integration patterns relevant to Generative AI-enabled product features.
- Eliminated frontend state inconsistencies across mobile, tablet, and desktop by architecting a Redux state management layer with React Router dynamic routing, reducing cart and session sync errors to zero.
- Accelerated team feature delivery by ~30% (measured by merge velocity across 4 developers) by configuring GitHub Actions CI/CD pipelines with automated build checks and enforcing Git branching with PR reviews.
- Enabled portable, reproducible deployments by containerizing the Spring Boot backend and MySQL database with Docker and Docker Compose; collaborated in Agile sprint planning, standups, and retrospectives across a 4-member team.

Task Manager App — Full-Stack CRUD Application | Nov 2025 – Dec 2025

Solo Developer

github.com/PAVANRYADUVANSHI/task-manager-app

Tech Stack: React.js, Spring Boot, MySQL, JWT, Maven, REST API, JUnit

- Shipped a complete multi-user task management system solo, end-to-end — from MySQL schema design to Spring Boot APIs to React frontend — demonstrating independent full-stack ownership.
- Achieved reliable API coverage with JUnit unit tests, validating CRUD operations and JWT-based auth flows.

Zomato UI Clone — Pixel-Perfect Responsive Frontend | Aug 2025 – Sep 2025

Team of 4 | Frontend Developer

github.com/PAVANRYADUVANSHI/zomato-ui-clone

Tech Stack: HTML5, CSS3, JavaScript, TypeScript

- Achieved pixel-accurate cross-device compatibility using CSS Grid and Flexbox layouts with media query breakpoints modelled on Zomato's production UI.
- Delivered interactive features with zero framework dependency using vanilla JS for dynamic content rendering, navbar behaviour, and video thumbnail interactions.

TECHNICAL SKILLS

Programming Languages: Core Java, JavaScript, TypeScript, SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Redux, Spring Boot, Hibernate/JPA, REST Assured

Generative AI / GenAI: OpenAI & Claude API integration, prompt engineering, AI chatbot development (NIIT coursework)

Build & DevOps: Maven, Docker, Docker Compose, GitHub Actions, AWS EC2

Testing & QA: JUnit, REST API Testing, Postman, Microservices Testing, Functional Testing

Databases, Tools & Concepts: MySQL, Git, VS Code, OOP, JWT Authentication, CI/CD, Agile/Scrum, Responsive Design, State Management

Soft Skills: Cross-functional collaboration, clear technical communication, ownership, fast learning ability, adaptability

EDUCATION

Java Full-Stack Developer Certification — NIIT Institute | Apr 2025 – Apr 2026 (In Progress)

Coursework: Core Java OOP, SQL Database Design, React.js, REST API Architecture, Microservices, Full-Stack Web App Development, Generative AI Fundamentals

Bachelor of Engineering (B.E.), Mechanical Engineering — JNNCE, Shivamogga (VTU) | 73% | 2020 – 2024

CERTIFICATIONS & ACHIEVEMENTS

- Java Full-Stack Developer Certification — NIIT Institute, 2025–2026 (in progress), incl. Generative AI Fundamentals.
- 3 full-stack projects on GitHub (food delivery platform with AI chatbot, task manager app, Zomato UI clone) — live portfolio at pavanryaduvanshi.github.io.
- Career transition from Mechanical Engineering to Software Development — self-driven, project-based learning path.
